Job Description

Our client is a well-established multinational company within the electronic components manufacturing industry, they are now seeking a seasoned **Engineering / Yield Manager** to lead and optimize engineering operations within their manufacturing plant. This role plays a vital part in overseeing production process engineering, driving yield improvement, and implementing automation and continuous improvement strategies to ensure the production meets the highest standards of quality, efficiency, and cost-effectiveness.

Location to work: Batu Berendam Industrial Zone, Melaka

Job Responsibilities:

- Lead and manage the manufacturing engineering team; provide training, development, and performance management.

- Develop and optimize manufacturing processes and standard operating procedures for efficiency, quality, and safety.
- Collaborate with cross-functional teams including Design Engineering, Quality, and Production to support product and process development.
- Monitor production yield and process data; analyze trends and implement corrective and preventive actions.
- Drive lean manufacturing practices and continuous improvement initiatives to reduce waste and boost productivity.
- Plan and implement new manufacturing equipment, technologies, and automation projects.
- Manage engineering resources and budgeting within the production environment.
- Provide technical guidance and troubleshooting support for complex manufacturing issues.
- Ensure adherence to ISO standards and industry regulations in all engineering operations.
- Work closely with vendors and suppliers to identify new technologies and cost-reduction opportunities.

Job Requirements:

- Bachelor's degree in Engineering (Mechanical, Electrical, Mechatronics or related field)
- Minimum 5 years of experience in manufacturing environment, preferably with a leadership or managerial exposure
- Strong knowledge of manufacturing process control, production line optimization and automation technologies
- Hands on experience with lean manufacturing, yield analysis and process improvement techniques
- Excellent leadership, analytical thinking and project management skills
- Familiar with ISO quality standards and compliance requirements in manufacturing
- Proficient in technical software/ tools used for manufacturing and engineering
