Job Description

Company Overview
An established multinational payment solutions provider is looking for a detail-oriented **DevOps Engineer Lead** to maintain the stability, security, and scalability of the production, UAT, and testing environments. You will be responsible for developing automation tools, monitoring system performance, and supporting PCI compliance.

Job Responsibilities

- Design and maintain automation scripts to enhance operational efficiency and reliability.
- Manage and deploy production, testing, and UAT environments while ensuring system health through routine checks and issue resolution.
- Maintain infrastructure monitoring using tools such as Prometheus, Grafana, and SkyWalking.
- Support PCI DSS compliance efforts, including vulnerability scanning and audit documentation.
- Collaborate with development teams to maintain CI/CD pipelines and ensure smooth, dependable deployments.

Job Requirements

- Bachelor's degree in Computer Science, IT, or related field.
- Minimum 5 years of experience in DevOps, IT operations, or infrastructure engineering, with strong scripting skills in Shell, Python, or Golang.

- Hands-on experience with cloud platforms (especially AWS and Alibaba Cloud), and familiarity with Docker and Kubernetes is a strong plus.
- Strong understanding of Linux systems, network protocols, and experience managing various services.
