Job Description

Company and Job Overview

Our client is a prominent manufacturing plant in South-East Asia, specializing in a diverse range of electronic products. They are currently seeking an experienced Development Operational Engineer to join their team.

Job Responsibilities

- Carry out Europe, Pan Asia and Latin Digital Logo Conformance and WW Digital Broadcasting Testing.
- Collaborate with cross-functional teams to define, design, develop and deliver new features for TV Product.
- Software defects management including detailed investigation, recreation, and analysis on broadcast software defects.

- Accountable for assigned project deliverables, including test reporting (progress, issues, etc) and test summary reports.
- Delivery of final test reports and documentation to obtain certification.
- Analyse broadcast requirements and work with team/technical experts in developing features and maintaining the Digital Test Suites or test cases.

Job Requirements

- Bachelor's degree in engineering/software engineering/computer engineering/computer science or related field or qualifications with significant relevant industrial experience.
- Possess strong English written and oral communication skills.
- Excellent skills in Software validation (Compliance Test, Functional Test, Performance Test, etc.) and verification.
- Possess skills or experience for Linux and one or more programming languages, preferably C/C or Java. (Kotlin is a plus)
- Able to work under pressure adaptable to different work priorities, multitasking and deliver task/project to tight deadlines.
- Ability to communicate effectively with all levels of organization and external customers.
- Experience in defect management tools (e.g. JIRA) is a plus.
- Experience in Software Development & Testing and Digital Broadcasting (Cable, Terrestrial or Satellite) is a plus.
- Possess certification in software testing such as CTFL, CSTE or any technical domain is a plus.
