Job Description

Company Overview

Our client is an established precision electronics components manufacturing company located at Pekan Nanas, Pontian, Johor. This is a newly generated position.

Job Description

- Lead and manage the engineering department, setting clear goals and mentoring team members to build a high-performance team.
- Develop and execute engineering strategies aligned with business objectives, overseeing projects from concept to production.

- Drive innovation in manufacturing processes, evaluating and approving changes in methods, materials, and machinery.
- Provide technical direction for complex problem-solving across production and quality functions, implementing long-term corrective actions.
- Ensure compliance with ISO standards and internal quality systems, supporting audits and managing technical risks.
- Collaborate cross-functionally with production, quality, and support teams to align technical goals with business needs.
- Act as the main engineering contact for customers and stakeholders, presenting updates and performance metrics to senior management.

Qualifications

- Degree in Electrical & Electronic, Mechanical, or Manufacturing Engineering.
- Minimum 5 years of experience in a related field and managerial position.
- Proficiency in quality and engineering tools.
- Excellent verbal and written communication skills in Japanese.
- Familiarity with ISO standards and certifications.

Benefits

Basic + Allowance + 13-month salary + Bonus 2 times/year + medical coverage for dependent.

Interested applicants feel free to apply online or contact us for more information.
