Job Description

JOB RESPONSIBILITIES

- To develop, implement, and continuously improve the QMS to ensure compliance with IATF 16949, ISO14001, ISO45001, ISO27001, and other standards.
- To create and maintain quality system documents (policies, procedures, and manuals) to meet regulatory and customer requirements.
- To lead customer quality audits, including preparation, coordination, rectification, and ensuring resolution of non-conformities in a timely manner.
- To build strong relationships with customers to meet or exceed their quality expectations and ensure Customer Specific Requirements (CSRs) are addressed effectively.
- To conduct regular audits and collaborate across departments to optimize processes, enhance efficiency, reduce waste, and improve overall quality.

- To promote a culture of improvement within the quality system team and spearhead initiatives to boost operational efficiency.
- To organize and deliver training programs to improve employees' understanding of quality standards, processes, and practices.
- To provide regular updates on QMS performance, audit results, and progress of process improvement projects.

JOB REQUIREMENTS

- Bachelor's Degree or Diploma in Engineering, Manufacturing Technology or equivalent.
- Minimum 5 years of experience as Quality Management (QA / QC / QMS) roles in Manufacturing / Engineering sector, experience in Automotive industry would be added advantage.
- Experience in Quality Systems Audits and Documentations.

Interested candidates are welcomed to apply online.
