Job Description

[Job Information]

- Department: Software Design
- Designation: Embedded Software Engineer
- Location: Japan & India

Task:

- Lead the end-to-end development of embedded software, from initial concept through to production deployment.
- Execute code reviews, perform rigorous testing, and debug software to optimize system performance and ensure reliability.

- Prepare and maintain detailed documentation outlining software architecture, functionality, and interface specifications.

Requirements:

- Bachelor's or Master's degree in Computer Science, Electrical Engineering, or a related field.
- Language: Japanese N3(or higher) and English
- Proficiency in C/C++/C# programming
- Experience: At least 3 years in implementing the entire embedded software development process
