### Job Description

**Company Overview**

Our client is a leading company specializing in providing engineering and project management services within the technical or industrial sector. They are involved in planning, coordinating, and executing projects, with a focus on areas like Equipment Installation, Piping Systems, and Construction Management. As they continue to drive growth and expansion, they are now seeking a Project Engineer to join their team and contribute to their ongoing success.

**Key Responsibilities**

- Coordinate with engineering/construction and client to ensure detail engineering requirements.
- Prepare quotations, budgets, and method statements.
- Manage material requisitions (Material Take-off/Material Requisition).
- Oversee equipment, structure, and piping installation.
- Address technical queries and drawing modifications.
- Conduct P&ID checks and prepare drawings.
- Manage mechanical clearance, hydro/pneumatic tests, and punch lists.
- Report project activities to senior management.

## Key Requirements

- Bachelor's Degree in Mechanical Engineering or related field.
- At least 2-5 years of project engineering/management experience.
- Strong engineering design and analytical skills.
- Proficiency in project management software.
- Excellent communication and collaboration abilities.
- Knowledge of project management methodologies.
- Willingness to travel domestically/internationally.
- Experience in biotech, freeze dryers, or related fields is a plus.

Apply online or feel free to contact me directly for more information about this opportunity. Due to the high volume of applicants, we regret to inform that only shortlisted candidates will be notified. Thank you for your understanding.
