Job Description

Company Overview

Our client a well-established leader and A1 main contractor in the civil engineering and construction industry, known for delivering high-quality projects across infrastructure, building, and specialized engineering sectors. As they continue to drive growth and expansion, they are now seeking a M&E Engineer, to join their team and contribute to their ongoing success.

Key Responsibilities

- Achieve project objectives within the constraints of scope, time, cost, and quality.
- Accurately interpret technical designs and drawings for on-site construction.
- Ensure all projects comply with relevant regulations and meet client specifications.
- Coordinate M&E services and prepare Combined Services Drawings (CSD) and Single-line Electrical Diagrams (SEM) for submission.
- Facilitate the integration of Civil, Architectural, and M&E works on site while liaising with clients, consultants, and subcontractors.
- Plan, develop, and monitor work schedules for timely completion of tasks.
- Prepare and present reports to clients and project managers regarding progress, delays, and defects, along with

- proposing rectification measures for M&E works.
- Provide expert technical advice and address M&E technical issues.
- Coordinate and report on the progress of M&E works, arranging site inspections with system-wide contractors, subcontractors, and clerks-of-works.
- Adhere to safety and health regulations with the objective of achieving zero accidents at the workplace.
- Maintain high standards of safety and housekeeping on site.

Key Requirements

- Bachelor's Degree in Civil, Mechanical, Electrical Engineering, or a related field.
- Experience in building services is advantageous.
- Excellent communication and coordination skills.

Apply online or feel free to contact me directly for more information about this opportunity. Due to the high volume of applicants, we regret to inform that only shortlisted candidates will be notified. Thank you for your understanding.
