Job Description

We are looking for a seasoned Data Engineering Manager.

Key Responsibilities:

- Oversee and guide a team of data engineers to ensure the successful delivery of data projects, managing timelines, budgets, and resources.
- Serve as a Data Engineering expert, designing and implementing scalable data architectures for both on-premise and cloud environments.
- Develop and enhance end-to-end data pipelines, ensuring optimal performance and efficiency.
- Work closely with business, IT, and development teams to integrate data solutions into existing systems.
- Uphold data governance, security, and compliance standards, while promoting best practices in data engineering.

- Mentor and support team members, fostering their professional growth.
- Collaborate with sales teams to understand client requirements, propose solutions, and ensure project success.

Qualifications:

- 6+ years of experience in data engineering, with a preference for experience in enterprise-level architecture design.
- Demonstrated experience in managing data teams, with strong leadership capabilities.
- Proficiency in multiple cloud technologies.
- Strong skills in client engagement and proposal development.
- Fluency in Thai and English, with excellent communication skills.
