Job Description

Company and Job Overview

A fast-growing international tech enterprise specializing in digital advertising technology and CRM platforms, with headquarters in Japan and operations across Southeast Asia and the United States.

Job Responsibilities

- Develop and maintain the backend of a CRM service application using Python 3.
- Design and implement new features for local product development based on business requirements.
- Monitor networks and systems to prevent potential threats or faults.
- Optimize web applications for performance, scalability, and maintainability.
- Stay up to date with the latest technology trends, continuously adopting best practices.
- Perform additional development-related tasks as assigned.

Job Requirements

- Minimum 3 years of experience in web application development (any language).
- At least 2 years of backend development experience using Python.
- Proficiency in cloud computing-based product development.
- Experience in designing architectures using AWS or GCP.
- Strong communication and teamwork skills.
- Ability to work independently with initiative.
- Experience with frontend frameworks: Vue.js, AngularJS, React.
- Understanding of sales support systems (e.g., Sales Force Automation).
- Experience developing customer management systems (CRM, ERP), including architecture and technology evaluation.
- Exposure to large-scale data infrastructure and distributed data processing.
- Agile/Scrum development experience.
- Japanese language proficiency (optional)

Benefit

- MacBook Pro provided for work.
- Full social, health, and unemployment insurance as per Vietnamese labor law.
- PTI insurance for employees and one family member.
- 12 annual leave days + 1 birthday leave.
- Salary review twice per fiscal year.
- Performance bonus up to 100% of gross monthly salary (biannual).
- Awards for Most Valuable Person/Team every 6 months.
- Annual company trip and yearly health check.
- Club participation allowance (up to $20/month).
