Hanoi

Company and Job Overview

We are a technology-driven company focused on modernizing the manufacturing industry through digital solutions. Our flagship product is a cloud-based platform that enhances productivity by streamlining the management and utilization of technical drawings—critical assets in industrial workflows. By integrating advanced infrastructure, automation tools, and developer-centric systems, we aim to accelerate innovation and efficiency across global manufacturing operations.

Job Responsibilities

- Collaborate closely with software engineers to enhance development efficiency and experience.
- Design, build, and maintain self-service tools and platforms that streamline workflows.
- Continuously improve development environments and processes, beyond just tool creation.
- Potential for assignment to other engineering teams based on experience and career goals.

Job Requirements

- Minimum 6 years of hands-on experience in backend development for web applications.
- Proven ability to make decisions on technology stack, architecture design, and system implementation.
- Strong experience with Test-Driven Development (TDD), and familiarity with automated tools such as Linters, Code Analyzers, API testing, and End-to-End testing.
- Proficiency in statically typed programming languages such as TypeScript, Rust, Java/Kotlin, Go, etc.
- Hands-on experience with public cloud platforms like AWS or Google Cloud.
- Fluent English communication skills (CEFR B1 or higher), including written and verbal interaction in a professional setting. Must currently reside in Vietnam or have plans to relocate.
- Foreign nationals must also hold a valid Vietnam work permit or be legally eligible to work in Vietnam.

Preferred Qualifications:

- Experience with container technologies (e.g., Kubernetes).
- Familiarity with Infrastructure-as-Code practices.
- Experience designing and operating CI/CD pipelines.
- Background in platform engineering within large engineering teams (50+ members).
- Exposure to Agile or Scrum methodologies.

Benefit

- Hybrid working model with flexible remote options.
- Official full-time employment with a 2-month probation period.
- Competitive compensation including 13th-month salary and biannual salary reviews.
- Full salary and mandatory insurances during probation.
- Premium health insurance and annual health check-ups.
- Paid leave: 12 annual days, national holidays, Tet, and year-end holidays.
- Various allowances: childcare, commuting, life events, etc.
- Support for professional growth: training subsidies, workshops, and external courses.
- High-spec devices provided based on individual needs.
- Recognition programs: company awards and MVP awards every 6 months.
- Team activities: year-end party, team building, and more.

Due to the high volume of applicants, we regret to inform that only shortlisted candidates will be notified. Thank you for your understanding.
