### Job Description

Job Title: Mechanical Engineering Manager

Location: Bac Ninh, Vietnam

#### Position Overview:

Our client is a global leader in designing and manufacturing high-performance interconnect systems for industries like automotive, aerospace, industrial, and consumer electronics, with strong operations in Vietnam and other key hubs.

We are seeking a skilled and experienced Mechanical Engineering Manager to lead the engineering team at a manufacturing facility in Bac Ninh.

#### Key Responsibilities:

#### Production & Process Management

- Handle and resolve production line mechanical issues and abnormalities.
- Improve existing production equipment and processes for efficiency and reliability.
- Lead the development and implementation of automation equipment, including robotic systems.

#### Tooling & Equipment Development

- Design and develop jigs and fixtures for new product introductions.
- Oversee non-standard automation equipment development tailored to electronics assembly.
- Manage equipment assembly, debugging, and optimization.

#### Team Leadership & Collaboration

- Lead and mentor a team of mechanical engineers and technicians.
- Collaborate with cross-functional teams including R&D, Quality, and Production.
- Coordinate with global engineering teams and suppliers.

#### Quality & Compliance

- Ensure mechanical designs meet industry standards and customer requirements.
- Support root cause analysis and corrective actions for mechanical failures.

#### Qualifications:

- College degree or above in Mechanical Engineering or related field.
- Hands-on experience with robotic systems and automation equipment.
- Proficiency in CAD and drawing software (e.g., SolidWorks, AutoCAD).
- Familiarity with office software (Excel, Word, PowerPoint).
- Ability to write technical documentation in English.
- Prior experience in electronics is a strong advantage.
