Job Description

Location
Bac Ninh

Company and Job Overview
Our client is one of the largest manufacturers of interconnect products in the world.

Job Responsibilities

- Design and develop MES applications based on business requirements, ensuring high performance and user experience.
- Implement system integrations between MES, ERP, SCADA, and other enterprise platforms using APIs and middleware.

- Manage and optimize SQL databases to ensure data integrity and performance (e.g., MS SQL Server, Oracle).
- Build intuitive user interfaces using HTML, CSS, and JavaScript, following UI/UX best practices.
- Create custom reports and dashboards using tools like Power BI and Tableau for data-driven decision-making.
- Collaborate with cross-functional teams and support QA/testing to ensure solution quality and reliability.

Job Requirements

- Bachelor's degree in Computer Science, IT, or related technical fields; MES experience (especially with Plex) is preferred.
- 4+ years in software development with strong OOP skills, ideally in C#, and experience in database design using SQL Server or Oracle.
- Solid web development skills (HTML, CSS, JavaScript) and familiarity with frameworks like React or Knockout.
- Experience with RESTful APIs, data integration, middleware, and cloud technologies (.NET Core, Kafka, Go, etc.).
- Understanding of manufacturing operations and MES concepts; knowledge of compliance in China is a plus.
- Agile development experience and relevant certifications in MES or software development are desirable.

Job Benefit

- Competitive salary with performance-based incentives
- Comprehensive health, dental, vision, and travel insurance coverage
- Company pension plan and health care spending account
- Supportive and collaborative international working environment
- Opportunities for professional growth and skill development
- Engaging company culture with regular social events like BBQs, holiday parties, and prize draws
