## Job Description

Our client is a manufacturing company which focuses on three core technological competencies: precision mold design, advanced material application development, and innovative injection molding techniques. Their Sg Petani facility embodies a fusion of traditional manufacturing excellence with modern smart technologies delivering high-quality production solutions from R&D stage through to final product realization.

## Job Descriptions

- Ensure the effective implementation of preventive monitoring mechanisms, implement problem rectification, and drive continuous improvement of quality
- Communication and coordination between the Quality Management Department and internal and external departments.
- Handling daily affairs within the Quality Management Department and promoting 5S activities within the department.

- Develop a talent demand plan based on the company's development strategy and business requirements, considering the actual situation of the department.
- Develop plans for improving the capabilities of department personnel and supervise the execution of training plans.
- Create a proactive team culture that fosters an atmosphere of progress and enthusiasm in the workplace.

#### Job Requirements

- Familiar with ISO Standards such as: ISO9001, ISO14001, able to independently write documents for quality management systems.
- Proficient in development process management, manufacturing operations processes and QC elements.
- Proficient in using QC tools, with deep understanding of PPAP, SPC, FMEA, MSA, and other related concepts.
- Outstanding capability in subordinate training, employee performance assessment, and coaching.
- Possesses strong organizational, analytical, communication, coordination, planning, and execution skills, as well as language proficiency.
- This role is based in Sg Petani.
