Job Description

This role is for a QA engineer specializing in test automation for a new e-commerce service, collaborating across international teams. Responsibilities include developing and maintaining test automation frameworks, executing automated tests, and contributing to CI/CD pipelines for both web and mobile platforms.

Client Details

A leading technology-driven company that operates one of Japan's largest e-commerce platforms. They are known for developing a wide range of digital services and tools that support merchants and enhance the online shopping experience, with a strong focus on innovation, scalability, and international collaboration.

Description

- **Develop and maintain** robust test automation frameworks for web and mobile platforms.
- **Execute and analyze** automated test results to ensure high-quality releases.
- **Collaborate globally** with cross-functional teams in Japan and China.
- **Contribute to CI/CD pipelines** to streamline testing and deployment processes.
- **Stay current** with the latest QA tools, technologies, and best practices.

Job Offer

- Career growing environment
- Flat open minded working environment
- Global working environment

Required Skills

- **Experienced QA professional** with experience in IT and in test automation.
- **Skilled in tools** like Selenium, Playwright, Appium, and CI/CD systems.
- **Strong communicator** who thrives in cross-cultural, multi-location teams.
- **Detail-oriented problem solver** with a solid grasp of ISTQB concepts.
- **Adaptable and proactive**, always learning the latest in QA and automation trends.
