Job Description

This role is for a senior backend application engineer responsible for leading and developing large-scale web systems that support one of Japan's largest e-commerce platforms. The position involves end-to-end backend development using Java, Spring Boot, and RESTful APIs, with a strong focus on system scalability, performance optimization, CI/CD, container orchestration, and team leadership.

Client Details

A leading tech-driven enterprise operating one of Japan's largest and most influential online platforms, serving tens of millions of users. Known for its high-traffic e-commerce environment and large-scale promotional events, the company offers a dynamic and challenging setting where engineers are empowered to drive innovation, optimize backend systems, and contribute to the continuous improvement of services that impact a vast consumer base.

Description

- Lead backend development projects for high-traffic web systems, ensuring performance and scalability.
- Design and implement robust APIs and backend services using Java, Spring Boot, and RESTful architecture.
- Collaborate with cross-functional teams to deliver reliable, maintainable, and secure systems.
- Drive CI/CD automation, containerization, and orchestration using Docker, Kubernetes, and Jenkins.

- Monitor and optimize system performance under high-load conditions, ensuring seamless user experiences.

Job Offer

- Career growing environment
- Flat open minded working environment
- Global working environment

Required Skills

- Proven leader with experience guiding backend teams and managing large-scale development projects.
- Expert in Java, Spring Boot, and RESTful API design with a strong grasp of software design patterns.
- Skilled in building scalable, high-performance systems with Docker, Kubernetes, and CI/CD pipelines.
- Strong problem-solver with hands-on experience in system monitoring, optimization, and troubleshooting.
- Collaborative communicator who thrives in fast-paced environments and values code quality and reliability.
