#### Job Description

We are seeking an Autosar expert for a position in the technology industry, based in Tokyo. The role involves developing, configuring, and maintaining Autosar-based systems to enhance technology solutions and ensure project success.

#### Client Details

The hiring company is a large organization in the technology and telecoms sector, known for delivering innovative solutions. With a focus on cutting-edge advancements, the company operates in a fast-paced environment and values technical expertise.

#### Description

- Develop and configure Autosar-based software solutions to meet project requirements.
- Collaborate with cross-functional teams to integrate Autosar components effectively.
- Perform testing and debugging to ensure software quality and reliability.
- Provide technical support and troubleshooting for Autosar-related issues.

- Document software designs, processes, and configurations accurately.
- Stay updated with Autosar standards and incorporate them into development processes.
- Optimize system performance by fine-tuning Autosar configurations.
- Ensure compliance with industry best practices and project deadlines.

#### **Job Offer**

- Competitive salary.
- Opportunity to work in Tokyo, a hub for technology and innovation.
- Exposure to advanced technology projects in the telecoms sector.
- Working Hours: 9:00 AM - 5:30 PM

Join a leading organization in the technology industry and contribute to cutting-edge projects. Apply now to take the next step in your career!

To apply online please click the 'Apply' button below. For a confidential discussion about this role please contact Krisztina Szokolai on +81366276101.

---

#### **Required Skills**

A successful Autosar expert should have:

- Strong knowledge of Autosar architecture and tools.
- Experience in software development for embedded systems.
- Proficiency in programming languages such as C or C++.
- Familiarity with debugging tools and software testing methodologies.
- An analytical mindset with attention to detail.
- Excellent problem-solving skills for technical challenges.
- A degree in Computer Science, Electrical Engineering, or a related field.
