Job Description

Our client is one of the Japan leading construction companies. They are currently looking to hire experienced Civil & Structural Engineers to take both technical and coordination responsibilities on site and design matters. You will need to lead the coordination with consultants and subcontractors, manage design reviews and ensure all structural works are delivered safely, timely and according to standards.

Job Responsibilities:

- Review and validate civil & structural drawings, calculations and technical documents
- Coordinate closely with consultants, local authorities and subcontractors for design approvals, inspections and construction execution
- Supervise site activities and ensure structural works are built as per design safety rules and quality standards
- Proactively identify and resolve technical issue at site
- Monitor construction progress and report and delay or risk to project team

- Assist in cost control, materials planning and method statement preparations
- Ensure all compliance with local codes and regulations

Requirements:

- Degree in Civil Engineering or Structural Engineering
- At least 5 years working experience in building construction or infrastructure projects
- Familiar with both site supervision and design coordination roles
- Experienced in liaising with consultants, authorities and managing subcontractor
- Knowledge of software such as AutoCAD, STAAD.Pro, ETABS or BIM tools is an advantage
- Good communication and leadership skills
- Able to speak and write in English, Mandarin and Malay
