Job Description

Our client a Japanese organization is seeking a skilled and motivated Technical Consultant specializing in Microsoft Dynamics 365 Finance and Operations (D365F&O) to join their global team. This role is perfect for a technically skilled professional with hands-on experience in solution architecture, programming, and testing—including RSAT —within the D365F&O platform.

Job Responsibilities:

- Design, develop, and implement custom solutions in D365F&O to meet specific business needs. This includes module configuration, workflow creation, and system integrations.

- Provide expert guidance across all technical aspects of D365F&O implementations. Stay current with platform updates and leverage new features to enhance solution effectiveness.

- Work closely with functional teams to understand business processes and requirements. Translate these into technical specifications and design scalable, best-practice solutions.

- Develop and execute comprehensive test plans to validate customizations and integrations. Support deployment

activities and provide troubleshooting assistance during and after implementation

- Partner with functional consultants, project managers, and developers to deliver cohesive solutions.

- Foster a culture of teamwork, continuous learning, and knowledge sharing.

Job Requirements:

- Degree/Diploma in Computer Science or equivalent qualification, at least 2 to 3 years of experience.

- Proven experience as a D365F&O Technical Consultant or similar role.
- Strong background as a developer with expertise in C#, HTML, JavaScript.
- In-depth understanding of D365F&O, including customization and configuration.
- Excellent problem-solving skills and attention to detail.
- Strong communication skills with the ability to explain complex technical concepts to non-technical stakeholders.
- Ability to work independently and as part of a team.
- A continuous learner who is enthusiastic about embracing new technologies and methodologies.
