Job Description

This role focuses on performing advanced laboratory testing and analysis in the field of immunology to support drug discovery projects. The Senior Medical Technologist will lead and support validation of new assays and instruments

Client Details

- A growing global clinical lab supporting drug development projects across immunology, microbiology, pathology, and more
- Renowned American business with long history in Japan

Description

- Perform and troubleshoot immunology-based laboratory testing and instrument operations
- Lead and support validation of new assays and instruments
- Develop and revise SOPs, and contribute to continuous process improvement
- Train new staff and act as a technical expert within the department

Job Offer

- Opportunity to work on global drug development projects
- International team with a flat structure, promoting open communication and collaboration
- Opportunity to lead and mentor junior staff, and aim for a leadership position within the organization
- Minimal overtime

Page Group Japan is acting as an Employment Agency in relation to this vacancy.

Required Skills

- Extensive knowledge of immunology testing and laboratory procedures.
 - Comfortable communicating in both English and Japanese (fluency not required)
 - Experience with assay validation and cross-functional team collaboration
 - Medical Technologist license in Japan or other countries
-
