Job Description

You will join an international IT team supporting enterprise applications. Working closely with product owners and global tech leads, you'll deliver high-quality UI features using React, Angular, and GraphQL.

Client Details

A major player in the global financial services sector is driving large-scale digital transformation across its investment platforms. The team is highly technical and agile, working across Tokyo and international hubs. They offer long-term collaboration, excellent tools, and a professional, multicultural environment.

Description

- Design and implement user-facing features using React.js and/or Angular
- Integrate APIs with GraphQL for efficient data retrieval
- Collaborate with backend engineers and product managers to define and deliver end-to-end solutions
- Review code, improve performance, and contribute to clean architecture and UI consistency

- Participate in sprint planning, technical discussions, and quality assurance processes

Job Offer

- Long-term renewable haken contract
- Potential to convert to permanent employee in the future
- Competitive salary
- Attractive benefits
- English-speaking, international work environment
- Work hours: 9:00-17:30, Monday to Friday

To apply online please click the 'Apply' button below. For a confidential discussion about this role please contact Hikari Takamura on +813 6832 8903.

Required Skills

- Around 8 years of frontend development experience with React or Angular
- Strong understanding of GraphQL and integrating it into frontend applications
- Familiarity with modern JavaScript/TypeScript tooling and testing frameworks
- Experience working in an agile environment and communicating with international stakeholders
- Professional working proficiency in English; Japanese not required
