### Job Description

The Senior Software Engineer (Data Engineer) will design, build, and maintain data pipelines and systems to support analytics and business intelligence initiatives. This role is ideal for someone with strong technical expertise in data engineering, looking to make an impact in the retail industry. Remote 100% job top retail and e-commerce company

**Client Details**

This small-sized company operates in the retail industry and is committed to leveraging data-driven insights to improve its business operations and customer experiences. It is known for its focus on innovation and delivering high-quality products and services.

**Description**

- Design and implement scalable and efficient data pipelines to support analytics needs.
- Collaborate with analytic and business teams to understand data requirements and translate them into actionable solutions.

- Develop and maintain data models to ensure accuracy and usability of data.
- Optimize data systems for performance, reliability, and scalability.
- Monitor and troubleshoot data systems to ensure seamless operations.
- Ensure data security and compliance with relevant regulations and best practices.
- Document processes, workflows, and system configurations for future reference.
- Stay updated with the latest tools and technologies in data engineering to implement innovative solutions.

#### Job Offer

- Competitive salary in the range of 7200000 JPY to 8800000 JPY annually.
- Flex time to accommodate work-life balance.
- Opportunities to work on innovative projects in the retail industry.
- Collaborative work environment based in Chiba.
- Permanent position offering job stability and career growth.

If you are a skilled Senior Software Engineer (Data Engineer) ready to contribute to a growing team in Chiba, we encourage you to apply and explore this exciting opportunity!
