Job Description

Company and Job Overview

Our client is a global trading specializing in a wide range of products. As part of their business expansion, they are seeking to hire a Technical Sales to drive revenue growth for their reinforced concrete structural design solution system within the construction industry. The role will be based in Kuala Lumpur.

Job Responsibilities

- Design and calculation of floor slabs and associated beams for reinforced concrete (RC) and steel-framed (S) buildings
- Perform structural calculations including rebar volume, strength, deflection rate and load capacity
- Interpret construction drawings and conduct structural calculations (using CAD) for general contractors
- Provide professional technical advice and support to clients
- Drive product sales and build strong relationships with contractors and industry stakeholders

Job Requirements

- Bachelor's degree in Civil Engineering, Architecture, Structural Engineering, or related field
- 3-5 years of experience in construction or technical sales related to reinforced concrete structural design
- Product sales experience is preferred
- Proficient in reading construction drawings and performing structural calculations
- Excellent communication and presentation skills
