Job Description

A leading provider of innovative connectivity solutions, specializing in the design and manufacture of cables, wire harnesses, and interconnect solutions for diverse industries including automotive, consumer electronics, and industrial applications. Our client is currently seeking a Facilities Assistant Manager to join their esteemed organization.

Job Descriptions

- **Strategic Planning:** Develop and execute a comprehensive operational strategy that aligns with the company's business goals, market trends (e.g., 5G, data centers, autonomous vehicles), and technological advancements in high-speed interconnects.
- **Operational Excellence:** Drive a culture of continuous improvement and implement Lean Manufacturing principles and automation initiatives to enhance efficiency, reduce costs, and maintain a competitive edge.
- **Supply Chain & Vendor Management:** Oversee the entire supply chain for specialized materials including strategic sourcing of high-performance connectors, low-loss dielectric materials, and fine-gauge wires.
- **Quality & Certification Management:** Establish and maintain robust quality management systems (QMS), ensuring the company holds and adheres to all necessary industry certifications (e.g., ISO 9001, AS9100 for aerospace, IATF 16949 for automotive, or MIL-SPEC for defense).
- **Capital & Budget Management:** Develop and manage the operational budget, including planning for significant capital expenditures on new manufacturing equipment and advanced testing labs.
- **Cross-Functional Leadership:** Collaborate with executive leadership, engineering, sales, and quality teams to ensure seamless integration from product design to final delivery.

- Risk Management: Identify potential operational risks, such as supply chain disruptions, quality issues, or technological obsolescence.

Job Requirements

- Bachelor's degree in Engineering, Business Administration, or a related field (an MBA is often preferred)
- Minimum 10 years and above of experience in operation, with at least 5 years and above in a managerial or supervisory role.
- Extensive senior-level experience in operations management within the high-speed interconnect, electronics, or a related high-tech manufacturing sector.
- Deep understanding of the technical and commercial aspects of high-speed cable assembly.
- Proven track record of developing and executing successful operational strategies.
- Expertise in managing complex, global supply chains and vendor relationships.
- Masterful knowledge of quality management systems and relevant industry certifications.
- Superior leadership, financial acumen, and communication skills.
