Job Description

COMPANY OVERVIEW

Our client is a Japan based global management consulting firm specializing in business transformation through strategy, digital technologies, and operational services.

JOB RESPONSIBILITIES

- Collaborate with business stakeholders and technology teams to gather and analyze data requirements related to banking products, transactions, customers, and reporting.
- Design and maintain logical and physical data models for core banking, risk management, compliance, and financial reporting.
- Translate complex business use cases into normalized and de-normalized data structures optimized for both operational and analytical workloads.

- Implement and evolve data marts, data warehouses, and data integration layers aligned with the client's data architecture.
- Work with development teams to deploy physical data models and optimize performance for large financial datasets.
- Ensure all data models comply with data governance, quality, and metadata management standards.
- Produce data documentation, including data dictionaries and lineage diagrams, for business, audit, and regulatory use.
- Support initiatives related to data lineage, metadata management, and data quality to enhance data trust and transparency.

JOB REQUIREMENTS

- Bachelor's degree in Computer Science, Information Systems, Data Science, or a related field.
- Min. 7–10 years of experience in data architecture, data modelling, or data management in the banking or financial services industry.
- Deep expertise in logical and physical data modelling, particularly for core banking, risk, compliance, and analytics use cases.
- Strong skills in data modelling tools such as Erwin, PowerDesigner, or similar.
- Advanced SQL skills with experience handling large, complex financial datasets.
- Solid understanding of relational and dimensional modelling, data warehousing, and integration techniques.
- Familiarity with data governance frameworks like DAMA-DMBOK.
- Experience with the American data management platform Collibra (non-development role) is a plus.
