### Job Description

**About the job**

We are looking for a talented **Integration Manager** who can work with new and existing game partners and help get out tools, products, and services working inside their games. The ideal candidate will possess a blend of technical and people skills, reasonable design and UX sensibility, and some understanding of how payments in gaming "should" work. You should have experience playing games. Applicants should expect to assist developers and technical personnel rapidly debug their technical issues and escalate or transfer as necessary - for this reason, ability to quickly diagnose basic technical issues and provide proper documentation is a must.

If you're passionate about driving business growth, supporting game developers, and expanding the reach of innovative gaming solutions, we would love to hear from you!

This role will be based out of our Japan office and is onsite.

### Core Responsibilities

- Workable technical problem-solving skills
- Ability to Diagnose issues using data dumps, technical logs, etc., and articulate useful information for solving these issues
- Ability to describe issues concisely based on client feedback
- Experience in customer service
- A team player who is able to pass issues onto appropriate parties or escalate when necessary
- Passion for new technology, tools, methods, paradigms, especially as it relates to games and payments
- Good communication skills. Ability to explain solutions eloquently and provide references to appropriate documentation. Some customer service experience is definitely a plus
- Command of online productivity tools (Confluence, Jira, ChatGPT, G Suite, Google Translate, etc) and ability to learn new tools as necessary
