- Lead and guide sales teams on handling customer quality issues
- Collaborate with HQ to maintain compliance with standards like ISO and GMP
- Deliver training and technical support on new and existing products to customers and sales teams
- Support sales efforts by developing materials, introducing new products, and analysing market trends
- Recommend solutions and applications tailored to customer needs
- Conduct seminars, support marketing initiatives, and participate in exhibitions and site visits

Requirements:

- Proven experience in applications engineering and customer-specific solutions
- Strong teamwork and ability to work independently with customers
- Skilled in solving complex problems and managing multiple projects
- Strong computer proficiency
- Professional level Japanese and English

Company Description

We've been a driving force in the Japanese bilingual recruitment market, providing high quality candidates for our clients and access to the best jobs for over 20 years. We operate a team-based profit share system which, we believe, sets us apart from the majority of competitors by enabling us to always put the interests of our clients and candidates first. That means we can find the best fit for employer and job seeker, and we never push people into unsuitable roles.
