#### Job Description

We are seeking an analyst to lead research on Artificial Intelligence and Analytics in Japan, with a focus on technologies, solutions, and generative AI. This role involves delivering in-depth market insights to clients while contributing to global and Asia-Pacific thought leadership from a Japanese market perspective.

#### Client Details

Our client is a leading global provider of market intelligence, advisory services, and events in the tech and telecom sectors, this company supports professionals and decision-makers with fact-based insights for strategic planning and technology investments. With over 1,000 analysts in more than 100 countries, they bring deep expertise across markets to help clients achieve their business goals.

#### Description

- Lead research and analysis on AI, analytics technologies, solutions, and generative AI in the Japanese market.
- Deliver strategic insights and market trends to clients to support data-driven decision-making.

- Collaborate with global and APAC teams to represent the Japanese perspective in international thought leadership.

#### Job Offer

- Lead AI and Analytics research in Japan with high market impact.
- Collaborate globally with top analysts and industry leaders.
- Join an award-winning, globally respected firm with strong growth opportunities.
- Competitive compensation package.
- Work from home availability (2 to 3 days per week).

To apply online please click the 'Apply' button below. For a confidential discussion about this role please contact Jamel Akalay on +81 3 6832 8935.

---

#### Required Skills

- Proven experience in AI/Analytics through consulting, product marketing, systems integration, or market research, with the ability to advise clients or senior stakeholders.
- Fluent level in Japanese and conversational English level.
- Proficient in Excel (pivot tables), Word, and PowerPoint, with a university degree and a strong understanding of the AI/Analytics business and technology landscape.
