Job Description

Key Responsibilities:

- **Cost Control & Optimization:**
 - Analyze and control costs across commodities such as Sheet Metal, Plastics/Rubber, Electronics, Machining, and Hardware.
 - Collaborate with design and development teams to fix target costs during project kick-off phases.
 - Provide cost insights during new product development and process changes, including tooling and part costs.
- **Data Management & Compliance:**
 - Develop, maintain, and update techno-commercial databases for fixed and variable costs.
 - Ensure adherence to financial policies and procedures.
 - Manage CapEx and summarize new model part costs.
- **Strategic Cost Planning:**
 - Monitor and control new model cost management.
 - Report cost progress and propose cost reduction strategies to purchasing management and stakeholders.
 - Address cost planning queries within defined lead times.
 - Budget and monitor overall organizational cost performance.

- Cost Analysis & Reporting:
 - Track cost registration progress and maintain ledgers for future reference.
 - Analyze cost trends and generate cost-saving ideas during project initiation stages.
 - Present findings to management to support strategic decisions.
- Process Improvement:
 - Map and streamline cost management processes in collaboration with cross-functional teams.
 - Foster strong cross-functional and cross-cultural relationships to support team building and collaboration.

Technical Skills:

- Strong knowledge of manufacturing processes and tooling.
- Proficiency in engineering costing and analytics.
- Expertise in cost reduction strategies and risk mitigation in techno-commercial aspects.
- Familiarity with processes in Sheet Metal, Machining, and Plastic/Rubber engineering
