### Job Description

Our client is one of the Japan leading construction companies. They are currently looking to hire experienced Civil & Structural Engineers to provide both technical and coordination support in design and site related matters with a focus on back-office project support. You will need to lead the coordination with consultants and subcontractors, manage design reviews and ensure all structural works are delivered safely, timely and according to standards.

#### Job Responsibilities:

- Review and validate civil & structural drawings, calculations and technical documents
- Coordinate closely with consultants, local authorities and subcontractors for design approvals, inspections and construction execution
- Supervise site activities and ensure structural works are built as per design safety rules and quality standards
- Proactively identify and resolve technical issue at site
- Monitor construction progress and report and delay or risk to project team
- Assist in cost control, materials planning and method statement preparations

- Ensure all compliance with local codes and regulations

Requirements:

- Degree in Civil Engineering or Structural Engineering
- At least 5 years working experience in building construction or infrastructure projects
- Familiar with both site supervision and design coordination roles
- Experienced in liaising with consultants, authorities and managing subcontractor
- Proficient in reading and writing Chinese (Mandarin) to coordinate with international teams
- Knowledge of software such as AutoCAD, STAAD.Pro, ETABS or BIM tools is an advantage
- Good communication and leadership skills, with fluency in English, Mandarin and Malay
- Able to work independently and manage multiple responsible
