Job Description

You will be responsible for developing and maintaining automated test scripts to ensure the reliability and performance of integrations between the database and the Salesforce ecosystem. You will work closely with business analysts, stakeholders, and system architects to gather integration understanding and translate it into test cases.

You will troubleshoot and resolve technical issues related to Salesforce implementations with internal teams and report them to Salesforce as needed.

You will work with database and other system teams to assist and support integrations with SF tools.

You will implement a comprehensive testing strategy to maintain high standards of software quality and user experience.

You will develop and maintain a CI/CD pipeline to automate the deployment of Salesforce changes to ensure fast and reliable updates.

You will optimize Salesforce configurations and integrations to improve the performance and scalability of Rakuten's solutions.

You will continuously monitor and optimize mobile application performance to ensure it meets user expectations.

You will continuously improve deployment processes, monitoring, and system reliability to support innovation.

You will be proficient in automation frameworks and CI/CD tools such as Jenkins, Bamboo, and Docker. You have a strong understanding of test automation, integration testing, and cloud technologies.

Develop and maintain automated test scripts to ensure the reliability and performance of integration between Databases and SF Ecosystem

Work closely with business analysts, stakeholders, and system architects to gather integration understanding and transform them into Test Cases

Troubleshoot and resolve technical issues related to Salesforce implementations within internal team and raise with SF if required.

Work with database and other system team to help and support the integration with SF tools .

Implement comprehensive testing strategies to maintain high standards of software quality and user experience.

Develop and maintain CI/CD pipelines to automate the deployment of Salesforce changes, quick and reliable updates.

Optimize Salesforce configurations and integrations to improve performance and ensuring scalability for Rakuten's solutions.
