#### Job Description

We are seeking a highly skilled and motivated Full Stack Developer. The ideal candidate will have a strong background in Java development, expertise in Spring Boot and the Spring Framework, and a solid understanding of database design and querying using SQL.

#### Client Details

Our Client is a leading IT E-Commerce Company

#### Description

- Design, develop, and maintain robust, scalable, and secure full-stack applications using Java, Spring Boot, and the Spring Framework.
- Implement and maintain RESTful APIs to support seamless integration with other systems and services.
- Develop and maintain front-end components using JavaScript, HTML, and CSS to support full-stack development.
- Ensure adherence to security best practices in all aspects of application development.

- Work with relational databases, write efficient SQL queries, and ensure optimal database performance.
- Apply design patterns to create clean, maintainable, and reusable code.
- Collaborate with cross-functional teams to gather requirements, troubleshoot issues, and deliver high-quality solutions.
- Utilize version control systems like Git and follow Agile methodologies for efficient project management.
- Stay updated with the latest trends and advancements in full-stack development and related technologies.

#### Job Offer

- Great work life balance
- Competitive salary
- Commute fare, Insurance and Pension fully covered
- We are only open for the candidates based in Japan with valid visa

To apply online please click the 'Apply' button below. For a confidential discussion about this role please contact Tianhong Han on +813 6832 8977.

---

#### Required Skills

- Strong proficiency in Java and SQL.
  - Strong experience with Spring Boot and the Spring Framework.
  - Proven experience as a Full Stack Engineer or similar role.
  - Hands-on experience with backend development using Java.
  - Solid understanding of database design and querying using SQL.
  - Basic to intermediate knowledge of JavaScript for front-end development.
  - Familiarity with front-end technologies (e.g., HTML, CSS, JavaScript) to support full-stack development.
  - Knowledge of software development best practices, including version control (e.g., Git) and Agile methodologies.
-
