Job Description

<u>Position:</u>	Quality Manager
<u>Salary:</u>	80,000 – 120,000 THB / month
<u>Welfares:</u>	Bonus, PVF, Housing, COLA
<u>Location:</u>	Sriracha, Chonburi
<u>Working Day:</u>	Only Monday to Friday
<u>Responsibilities:</u>	

- Develop, implement, and maintain the plant's Quality Management System in accordance with international standards, such as ISO 9001.
- Ensure all manufacturing processes and products are in full compliance with relevant industry standards, regulations, and company policies.
- Lead and manage internal and external audits (e.g., ISO 9001, customer audits) and ensure timely and effective

closure of all findings.

- Prepare and present regular reports on quality metrics, performance, and trends to the Thai Quality Manager and other senior management.
- Lead, mentor, and develop the plant's quality assurance team, fostering a culture of ownership, accountability, and continuous learning.
- Promote a plant-wide culture of quality excellence, where everyone is responsible for quality and safety.
- Oversee all quality control activities from raw material inspection (incoming quality control) to in-process and final product inspection.
- Implement and manage statistical process control (SPC) to monitor and control key process parameters and prevent defects.
- Lead the investigation of quality issues, both internal and external (customer complaints), using root cause analysis (RCA) tools such as 8D, Ishikawa (fishbone) diagrams, and 5 Whys.
- Implement and verify the effectiveness of corrective and preventive actions (CAPA) to mitigate quality issues and prevent recurrence.
- Drive and lead continuous improvement initiatives using methodologies such as Six Sigma, Lean Manufacturing, and Kaizen to reduce waste, improve efficiency, and enhance product quality.
- Collaborate with other departments, including Production, Engineering, and Supply Chain, to identify and resolve quality-related problems.
- Work closely with the sales and service teams to analyze customer feedback and translate it into actionable improvements.
- Manage the supplier quality assurance program, including supplier audits, qualification, and ongoing performance monitoring.
- Ensure that all incoming materials and components meet quality specifications.

Qualifications:

- Bachelor's degree in Engineering (Mechanical, Electrical, Industrial, or a related field) or a relevant discipline.
- Minimum of 10 years of experience in a quality management role within a manufacturing environment, preferably in the automotive, electronics or a similar industry. Strong knowledge of production processes and quality control standards.
- Proficiency in quality and problem-solving tools, such as Six Sigma (Green or Black Belt certification is a plus), SPC, FMEA, 8D, and RCA.
- Excellent attention to detail and problem-solving skills.
- Strong leadership and communication skills.
- Ability to work collaboratively with cross-functional teams.
- Good command in English.
