### Job Description

- Develop and maintain automated test scripts to ensure reliability and performance of integrations between databases and the SF ecosystem
- Work closely with business analysts, stakeholders and system architects to gather integration understanding and translate it into test cases
- Troubleshoot and resolve technical issues regarding Salesforce implementation with internal teams and escalate to SF as needed.
- Work with database teams and other systems teams to help with integration with SF tools.
- Implement a comprehensive testing strategy to maintain standards for software quality and user experience.
- Develop and maintain a CI/CD pipeline for automated deployment of Salesforce changes, ensuring fast and reliable updates.
- Optimize Salesforce configuration and integration to improve performance and scalability of Rakuten's solutions.
- Continuously monitor and optimize the performance of your mobile applications to ensure they meet user expectations.
- Drive continuous improvement of implementation processes, monitoring, and system reliability to support Rakuten's innovation.
- Familiarity with automation frameworks and CI/CD tools such as Jenkins, Bamboo, Docker, etc. Strong understanding

of test automation, integration testing and cloud technologies.

- Develop and maintain automated test scripts to ensure the reliability and performance of integration between Databases and SF Ecosystem
- Work closely with business analysts, stakeholders, and system architects to gather integration understanding and transform them into Test Cases
- Troubleshoot and resolve technical issues related to Salesforce implementations within internal team and raise with SF if required.
- Work with database and other system teams to help and support the integration with SF tools.
- Implement comprehensive testing strategies to maintain high standards of software quality and user experience.
- Develop and maintain CI/CD pipelines to automate the deployment of Salesforce changes, ensuring quick and reliable updates.
- Optimize Salesforce configurations and integrations to improve performance and scalability for Rakuten's solutions.
- Continuously monitor and optimize the performance of mobile applications to ensure they meet user expectations.
- Drive continuous improvement in deployment processes, monitoring, and system reliability to support innovation.
