Job Description

Job Description:

1. Ensure smooth operation of production lines by conducting root cause analysis of line stoppages and implementing effective solutions.

2. Possess strong technical knowledge of PLC programming, including troubleshooting and minor modifications.

3. Proficient in Fanuc and Mitsubishi software for equipment troubleshooting.

4. Skilled in AutoCAD for preparing technical drawings and specifications independently.

5. Manage tool life and spare parts, including maintaining appropriate reordering levels.

6. Familiar with SAP for regular production-related data entry and management.

7. Capable of delivering effective shop floor training to team members.

8. Experienced in working with ISO 45001, ISO 14001, IATF 16949, and handling customer audits.

9. Promote a Quality Circle mindset and foster team-building initiatives.

10. Proficient in MS Office applications for documentation and reporting.

11. Aware of safety protocols, including near-miss reporting, KYT (Kiken Yochi Training), and hazard identification.

12. Proactive in initiatives aimed at improving customer satisfaction levels.
