Job Description

A leading provider of innovative connectivity solutions, specializing in the design and manufacture of cables, wire harnesses, and interconnect solutions for diverse industries including automotive, consumer electronics, and industrial applications. Our client is currently seeking for PMC Manager to overseeing the production & material control and inventory management in the company.

Job Responsibilities

- Develop and implement production control and material management strategies to optimize workflow and inventory levels
- Lead the planning and scheduling of production activities in alignment with customers' demand and capacity constraints
- Oversee procurement coordination to ensure timely availability of raw materials and components
- Monitor inventory levels and implement controls to prevent shortages, overstocking and obsolescence
- Collaborate with cross-functional teams including procurement, logistics, engineering and quality assurance
- Analyze production data and KPIs to identify inefficiencies and drive continuous improvement initiatives
- Ensure compliance with safety, quality, and regulatory standards in material handling and storage
- Manage and mentor the production control and materials team, fostering a culture of accountability and performance
- Maintain accurate records of inventory transactions, production orders and material movements
- Support ERP/ MRP system optimization and ensure data integrity across planning modules

Job Requirements

- Bachelor Degree in Supply Chain Management, Industrial Engineering, Business Administration or related field
- At least 10 years of experience in production control, material planning or inventory management with minimum 3 years in managerial role
- Proficient in English, Malay and Mandarin to communicate with customers from different region including China, Taiwan, Malaysia, etc.
