Job Description

You will lead projects end-to-end (from PoC to MVP to production), working directly with clients and global teams. This is a highly visible role where you will bridge business and technology, manage delivery, and build long-term client relationships.

Key Responsibilities

- **AI Strategy Design** – Map appropriate AI technologies to client business goals and create roadmaps for value validation.

- **Project Leadership & Management** – Lead requirements definition, progress tracking, and risk management using agile methods such as AI × Scrum. Collaborate with internal and external stakeholders to drive projects forward.

- **Financial & Client Management** – Share progress and challenges, manage scope and budgets, and build strong trust with clients.

- **Long-Term Account Management** – Identify new challenges after project delivery and propose solutions, ensuring

continuous client value.

- **Global Collaboration** – Partner with offshore development and operations teams to deliver projects in an international environment.

Required Skills

Required Experience & Skills

Must have (one of the following):

- Project management, project leadership, or requirements definition experience in **web, mobile, or enterprise system development projects**.
- Practical project management experience using **tools such as Jira or Git**.

Preferred Experience & Skills

- Hands-on use of **generative AI tools**, such as:

  - Cursor: source analysis, automated code reviews, prototype validation.

  - Claude / ChatGPT / Gemini: requirements drafting, risk analysis reports, automated meeting summaries.

  - GitHub Copilot / Copilot Chat: test case generation, technical research notes.

  - PowerBI Edge Copilot: real-time KPI dashboard updates.

- Experience creating **business transformation roadmaps**.

- Demonstrated ability to deliver **long-term client value** and increase LTV.

- Process management experience.

- Data-driven decision-making experience.
