### Job Description

#### Key Responsibilities

- Execute comprehensive testing and commissioning activities, including Factory Acceptance Tests (FAT), Site Acceptance Tests (SAT), and Integrated Systems Testing (IST).
- Ensure strict compliance with relevant Indonesian regulations and standards, such as SNI, PUIL 2011, and PLN guidelines, throughout all testing and commissioning phases.
- Develop and implement testing procedures that align with both customer specifications and local authority requirements.
- Troubleshoot and resolve technical issues affecting power generation and distribution systems.
- Collaborate with project stakeholders, including EPC contractors, consultants, and PLN representatives, to facilitate grid synchronization and testing.
- Prepare and manage all necessary documentation, such as commissioning reports, checklists, as-built drawings, and operational manuals, in both Bahasa Indonesia and English as needed.
- Provide on-site support for genset installation, testing, and final handover to clients.
- Coordinate with Original Equipment Manufacturers (OEMs) and factory teams to ensure testing protocols align with local standards.
- Participate in site and coordination meetings to ensure project timelines are met.
