Job Description

Position: R&D Supervisor (Food manufacturing)

Salary: 30,000 – 40,000THB +/- (Negotiable)

Location: Saraburi / Lopburi

Our client is big brand manufacturing frozen food products.

Key Responsibilities of the position:

- **Product Development & Innovation:** Lead the creation of new food products from initial concept to commercial production. This includes formulating recipes, selecting and testing ingredients, and ensuring products meet consumer demand and company standards.
- **Team Leadership & Management:** Supervise, mentor, and train a team of food technologists and scientists. Oversee

daily R&D activities, assign projects, manage timelines, and ensure a collaborative and productive work environment.

- **Process Improvement:** Drive initiatives to improve existing products by enhancing their taste, texture, nutritional value, shelf life, or cost-efficiency. This involves experimenting with new ingredients, technologies, and production methods.
- **Regulatory Compliance:** Guarantee all products and processes adhere to food safety regulations, including those set by organizations like the FDA, as well as internal quality standards like HACCP and GMP.
- **Project Management:** Manage R&D projects from a technical and administrative perspective, including budgeting, resource allocation, and reporting progress to senior management.

Qualifications

- Bachelor's or master's degree in Food Science, Food Technology, Food Engineering, or a related field.
- More than 3-5 years of experience in R&D food manufacturing.
- level communication skills in English.
- Advance using Excel Program.
- Knowledge in HACCP and GMP.
