Job Description

The core platform allows encrypted data to be collected, analyzed, and processed by AI — all without decryption — making it ideal for secure cross-company or cross-department data collaboration.

You will join a cross-functional product team responsible for developing our secure AI platform. You'll take ownership of frontend development, working closely with product managers and backend engineers to build and improve our customer-facing interfaces.

Your responsibilities will include:

- Designing and implementing user interfaces with VueJS (or similar frameworks)
- Integrating with secure backend APIs
- Writing clean, maintainable, and scalable code
- Participating in project planning and feature discussions
- Collaborating with a global and diverse team

Tech Stack

- **Frontend:** JavaScript (VueJS, ReactJS)
- **Backend APIs:** RESTful architecture
- **Cloud:** AWS
- **Security:** Confidential computing, data encryption, AI inference over encrypted data

Required Skills**Must:**

- Over 2 years of experience in web application development
- Proficiency in VueJS or similar JS frameworks
- Experience with RESTful API integration
- Strong CSS and UI/UX fundamentals
- Business-level English
- Passion for AI and secure computing

Preferred:

- Experience building SaaS products on AWS
- Knowledge of SEO and performance optimization
- Experience launching products from 0 → 1
- Business-level Japanese
