Job Description

We are looking for a detail-oriented and proactive Software Tester to join our client development team.

Responsibility:

- Design and carry out test scenarios to validate system features and performance.
- Apply manual testing techniques to assess usability, compatibility, and functionality.
- Log and track issues clearly using our internal ticketing system.
- Collaborate with developers to troubleshoot and verify fixes.
- Share insights and feedback during QA meetings.
- Explore and begin applying automated testing tools and frameworks.
- Keep documentation up-to-date, including test procedures and reports.
- Support senior testers in building comprehensive test strategies.
- Contribute to other quality assurance activities as needed.

Qualification:

- 2+ years of hands-on experience in software testing.
- Familiarity with software development processes and lifecycle.
- Understanding of core testing methods like black-box and white-box testing.
- Skilled in creating and executing test cases.
- Strong attention to detail and a commitment to delivering quality.
- Willingness to learn new tools and testing approaches.
- Able to work both independently and collaboratively.
- Excellent communication and problem-solving abilities.
- Analytical mindset with solid critical thinking skills.
- Comfortable using English in a professional setting.
