Job Description

Company Overview and Job Overview

A forward-thinking technology firm specializing in industrial automation is seeking a visionary and dynamic Head of Technology Strategy to lead its Research & Development, Marketing, and Corporate Strategy functions. This executive role is central to shaping the organization's technological direction, driving innovation, strengthening market positioning, and steering long-term strategic growth. The ideal candidate will bring a unique blend of technical expertise, strategic insight, and commercial acumen to help elevate the company's impact in a rapidly evolving industry.

Key Responsibilities:

- Technology & R&D Leadership
 - Define and drive the company's technology roadmap aligned with business goals.
 - Oversee all R&D initiatives, ensuring innovation, efficiency, and alignment with market needs.
 - Foster a culture of technical excellence, experimentation, and continuous improvement.
 - Evaluate emerging technologies and trends to maintain competitive advantage.

- Marketing Oversight
 - Collaborate with marketing leadership to position the company as a market leader.
 - Ensure product-market fit through close alignment between R&D and marketing strategies.
 - Guide branding, messaging, and go-to-market strategies for new products and solutions.
 - Support customer engagement and feedback loops to inform product development.
- Corporate Strategy
 - Lead strategic planning and execution to drive sustainable growth.
 - Identify new market opportunities, partnerships, and business models.
 - Work closely with the CEO and executive team to align technology and business strategy.
 - Represent the company in high-level industry forums, partnerships, and investor meetings.

Key Requirements:

- Proven experience in a senior technology leadership role, ideally in automation, robotics, or industrial systems.
- Strong track record in leading cross-functional teams across R&D, marketing, and strategy.
- Deep understanding of both technical and commercial aspects of product development.
- Strategic thinker with the ability to translate vision into actionable plans.
- Excellent communication, leadership, and stakeholder management skills.
- Bachelor's or Master's degree in Engineering, Computer Science, or related field; MBA or equivalent is a plus.

Benefits:

- A key leadership role in a high-impact, innovation-driven company.
- Competitive compensation package, including performance-based incentives.
- Opportunity to shape the future of industrial automation.
- Collaborative and entrepreneurial work environment.
