Job Description

COMPANY OVERVIEW

A well-established company in the electrical & network components manufacturing industry is hiring for Automation Engineer position. The company is committed to advancing automation, robotics, and sustainable manufacturing practices. Globally recognized for its innovation and quality, the company develops high-performance solutions that support enterprise-wide environments in the engineering and manufacturing sector.

JOB RESPONSIBILITIES

- Execute manufacturing engineering tasks, both routine and complex, following established procedures.
- Support automation initiatives through PLC programming, system integration, and troubleshooting.
- Lead or contribute to technical projects, managing formal requests and reporting progress through visual and written summaries.
- Investigate and resolve manufacturing and automation issues, escalating challenges to ensure timely resolution.
- Create and maintain technical documentation, including test records and automation schematics.
- Collaborate with cross-functional teams and build strong working relationships to drive project success.

JOB REQUIREMENTS

- Bachelor's Degree in Electrical Engineering, Mechatronics Engineering, Automation Control System Engineering or related field.
- Preferably with at least 2 years of experience in a manufacturing environment with exposure to automation systems.
- Knowledgeable in PLC programming and Automation Applications in Manufacturing.

Interested candidates are welcomed to apply online.
