Job Description

Our client is a Japan based global manufacturer specialize in ceramic components, electronic parts. They are now seeking and experienced **Production Manager (Technical) – Injection Moulding** to lead the production operations, ensure optimal machine performance, quality yield and production efficiency while driving continuous improvement initiatives.

Job Responsibilities: -

- Oversee daily production activities for injection moulding and dry powder press lines to meet quality, cost, and delivery targets.
- Lead a team of technicians, supervisors, and production operators to ensure smooth operations and machine uptime.
- Manage machine setup, parameter optimization, and mould changeover for different product requirements.
- Troubleshoot production issues related to machine settings, moulding defects, and yield losses to minimize downtime.
- Implement process improvement projects to enhance productivity, reduce waste, and improve product quality.
- Ensure compliance with safety standards, ISO/TS16949, and quality management systems.
- Collaborate with engineering, quality, and maintenance teams for preventive maintenance and process enhancement.

- Analyze production data (OEE, scrap rates, downtime) and present reports to management.
- Train and develop production staff in technical skills and problem-solving techniques.

Job Requirements: -

- Diploma/Degree in Mechanical/Manufacturing/Production Engineering or equivalent.
- Minimum 3-5 years in injection Moulding production with experience leadership
- Hands-on experience in dry powder press or ceramic moulding is highly desirable.
- Strong knowledge of machine setting & mould adjustment techniques.
- Familiarity with production troubleshooting, yield improvement, and process optimization.
