Job Description

They are a fast-growing tech company transforming the global logistics and trade industry through digital innovation. Their cloud-based platform streamlines complex operations and increases visibility across international supply chains.

What You'll Do

- Design and develop new features of our in-house product
- Collaborate with product managers and industry experts in logistics and supply chain

- Improve and maintain existing systems to support operational excellence
- Participate in the migration from a monolithic system (Ruby on Rails) to a service-oriented architecture (Go)
- Build clean, efficient APIs and contribute to our evolving architecture
- Own significant parts of the product and help drive technical decisions

Tech Stack

- **Languages & Frameworks:** Ruby on Rails, Go, React (via GraphQL)
- **Infrastructure:** AWS
- **Version Control:** GitHub
- **CI/CD:** CircleCI
- **Project Management:** JIRA, Notion

Remote Work: Up to 4 days per week

Required Skills

Required

- 1+ years of experience in back-end application development
- Proficiency in developing with a modern JavaScript web framework (React, Vue, etc.)
- Experience building and designing APIs
- Strong communication skills, both technical and non-technical
- Valid work authorization or related degree for visa sponsorship
- Business-level English
- 2+ years of experience developing and operating web services

Preferred

- Communication skills in Japanese
 - Agile development experience
 - Experience with cloud infrastructure (AWS, GCP, etc.)
 - Passion for B2B product development
 - Comfortable working in a fast-paced startup environment
 - Intellectual curiosity and a drive to solve real-world problems
-
