### Job Description

They are a fast-growing tech company transforming the global logistics and trade industry through digital innovation. Their cloud-based platform streamlines complex operations and increases visibility across international supply chains.

**Role:**

**DevOps Engineer** who is passionate about improving infrastructure, enhancing developer workflows, and ensuring secure, stable, and scalable systems.

You'll be part of the **Platform and Security** team, which plays a key role in optimizing engineering processes and supporting the deployment of innovative features for our logistics platform.

## Responsibilities

- Support the design, development, and maintenance of **CI/CD pipelines**
- Help automate manual engineering processes to improve **efficiency and scalability**
- Assist in integrating **security best practices** across the DevOps lifecycle (DevSecOps)
- Work with infrastructure as code (IaC) using tools like **Terraform or AWS CDK**
- Maintain and improve **monitoring, logging, and observability** systems (e.g., Datadog, Prometheus)
- Collaborate with software engineers to support **infrastructure setup, deployment, and troubleshooting**
- Contribute to **internal documentation** and knowledge sharing
- Participate in **incident response and support**
- Keep up to date with the latest trends in DevOps and security
- Contribute to **open-source projects** where applicable

**Remote Work:** Up to 4 days per week

---

## Required Skills

### Required Qualifications

- 2+ years of experience in **DevOps** or **Software Engineering**
- Proficient in scripting languages (e.g., **Python, Bash, Perl, Awk**)
- Experience with IaC tools (e.g., **Terraform, CDK**)
- Familiarity with **CI/CD tools** (e.g., GitHub Actions, Jenkins)
- Working knowledge of **cloud platforms** (e.g., AWS, GCP)
- Experience with **Docker, Kubernetes**, and container orchestration
- Understanding of **monitoring tools** (e.g., Datadog, Splunk) and **metrics platforms** (e.g., Grafana, Prometheus)
- Proficient with **Git version control**
- Bachelor's degree in **Computer Science** or a related field
- Strong **problem-solving** and **analytical** skills
- Excellent **communication skills in English**
- Clear understanding of the **DevOps culture**

### Preferred Qualifications

- Background in **software engineering**
  - Experience developing **web applications**
-
