Job Description

We are seeking an experienced Project Manager to drive large-scale data platform initiatives supporting one of Japan's largest e-commerce ecosystems. This role offers end-to-end project ownership, from planning to execution, across data infrastructure, analytics, and AI solutions.

Client Details

The hiring team is part of the Business Support Development Department, focusing on developing and operating data platforms that power the core business of a leading e-commerce group. Their mission is to accelerate business growth through robust data infrastructure, advanced analytics, and AI-driven innovation.

Description

- Creating detailed project plans with milestones and KPIs
- Overseeing the full software development lifecycle
- Coordinating with cross-functional teams and senior stakeholders
- Managing budgets and optimizing costs

Job Offer

Engaging work environment in Tokyo, with access to cutting-edge technology.

To apply online please click the 'Apply' button below. For a confidential discussion about this role please contact Anna Fuji on +81366276095.

Required Skills

- PMP or Scrum Master certifications
- Experience in data platform or AI/ML projects
- Familiarity with tools such as JIRA, Confluence, Redmine
- Basic understanding of SQL, Python, and cloud DWH
- Business-level Japanese and conversational English
