Job Description

Company & Job Overview
Location: Hanoi, Vietnam

We are committed to innovation and excellence, offering a dynamic environment where engineers can grow professionally while contributing to impactful projects.

Job Responsibilities

- Design, develop, and maintain cloud-based management systems for various network products.
- Explore and implement modern cloud technologies and network management strategies.
- Troubleshoot and resolve software-related issues reported by clients.
- Collaborate closely with internal development teams to ensure smooth system integration and optimal performance.

Job Requirements

- Bachelor's degree or higher in Computer Science, IT, or a related field.

- Strong programming skills in Java, JavaScript ES6, React, and database development.
- Hands-on experience with Spring Boot; knowledge of MVVM architecture is a plus.
- Familiarity with MySQL is preferred.
- Excellent problem-solving and debugging abilities.
- Quick learner with adaptability to new technologies.
- Moderate English proficiency in both written and verbal communication.

Benefits

- Attractive salary package with performance-based bonuses.
- Opportunities for career advancement and professional training.
- Friendly, supportive, and collaborative work culture.
- Full coverage of social insurance and other statutory benefits.

Due to the volume of applications, only shortlisted candidates will be contacted. Thank you for your interest.
