Job Description

C#

Position: System Engineer

Overview: System development for financial institutions

Job Description:

Due to the expansion of system development projects for financial institutions, we are seeking engineers with C#.NET

Responsibilities:

- Develop systems for financial institutions using C#
- Design and implement functions from front-end to back-end based on requirements
- Participate in all phases of system development: requirements definition, basic design, detailed defining
- Accurately understand the business needs of financial institutions and build systems
- Participate in team-based development
- Execute development tasks according to the project schedule
- Collaborate with other team members and stakeholders to ensure smooth development

Development Process Management:

- Manage schedules and quality

- Conduct code reviews, unit/integration testing, and analyze results

Skills:

- Required: Over 10 years of experience in system development using C#.NET
- Required: Over 5 years of experience in financial system development, especially in requirements
- Strong coordination skills with related departments and stakeholders

Languages:

- English (Business level)

Location: London

Working Hours: Monday to Friday, 9:00 AM - 5:00 PM

Work Style: Hybrid (on-site at client location and remote work)

Employment Type: Full-time employee or contract employee

Salary: £40k - £65k
