Job Description

Company Overview and Job Overview

A leading provider of advanced automation solutions, specializing in leak testing technologies for a wide range of industries, is seeking a skilled and motivated PLC Programmer to join our automation team.

This role offers the opportunity to work on full-cycle automation projects—from initial design and programming to commissioning and onsite support. You'll be part of a collaborative engineering environment focused on innovation, precision, and continuous improvement.

Key Responsibilities

- Develop and program control systems using PLC and HMI platforms.
- Manage and execute automation projects from design to commissioning.
- Design electrical schematics and oversee wiring processes.
- Provide onsite service, troubleshooting, and technical support.
- Collaborate on standardization efforts within system control.
- Work closely with cross-functional teams to ensure project success.

Key Requirements

- Bachelor's Degree or higher in Electrical/Electronic or Mechatronic Engineering.

- Proficiency in Siemens PLC, HMI software, and C# programming in Visual Studio.
- Familiarity with analog signal processing and AutoCAD Electrical is a plus.
- Bilingual proficiency in English and Mandarin is required to support client communications.
- Experience in leak testing technologies is advantageous.
- Minimum of 2 years of relevant experience preferred; fresh graduates are encouraged to apply
